Fractions

To add fractions with different denominators, first find a common denominator. Then add the numerators and keep the denominator.

Example: 1/2 + 1/3 = 3/6 + 2/6 = 5/6.

Ratios

A ratio compares two quantities. The ratio 2:3 means for every 2 of the first there are 3 of the second.

النسبة تقارن بين كميتين. النسبة ٢:٣ تعني أنه مقابل كل ٢ من الأولى يوجد ٣ من الثانية.
